Content Validity

Content validity concerns the extent to which a measure adequately represents all facets of a concept. Consider a series of questions about what it means to feel healthy. If a person never feels like eating, is it fair to say they are healthy? If there were other kinds of measures to assess health, such as depressed mood or physical indicators, the index might not accurately represent all facets of the concept of health.

Validity And Reliability

So what is the relationship between validity and reliability? These two do not necessarily go hand in hand. A measure can be highly reliable (repeatable over time) but lack validity (not measuring what it is supposed to measure).

Figure 1.1

we expect it to? A good self-esteem test should measure a person's sense of self-worth. In psychology, high self-esteem is usually associated with fewer anxiety and depression symptoms, while low self-esteem is often associated with anxiety and depression symptoms. The concept of the self-esteem measure is important, as those with higher scores are often more likely to experience depression than those with lower scores.

SQ3R: Read

The Paleozoic era

A drastic change in the history of animal life on Earth marked the start of the Paleozoic (pay lee uh ZOH ihk) era. In the space of just a few million years, the ancestors of most major animal groups diversified in what scientists call the Cambrian explosion.

Game Quiz
Exam
Manual Guide

1. Please set your alarm clock for each step.

2. If you have any technical problems, please restart from the first step or ask teacher.

3. You need to take examination at the end of the
Round 1
Set 10 Min.

1. Students look at the example of the presentation in this book and survey the structure of the table of contents, the specific vocabulary and overall image of this book;

2. Highlights the main part, key word, and the fact from the book that the student has read; and

3. Once completed, move on to the next process.

Animation of a mother opens the door and see her child sleeping on the bed. Then the alarm clock beeps on the monitor of the giggle robot.

**Mother:** Wake up son! The alarm clock on the giggle robot keeps beeping.
**Son:** What time is it now?
**Giggle robot:** a quarter to Seven O’clock.
**Mother:** Hurry! We have to go to school.
**Son:** Yes, Mom.
**Mother:** Tidy your bed and blanket. Pull out your bed sheet and turn off the air conditioner too.
**Son:** I will go down in a few minutes.
Another important thing you can do is remind your parents to use electricity wisely! Get your parents to buy some new "compact fluorescent" light bulbs. Each light bulb can reduce pollution by 500 pounds per year! Do a bulb count! How many bulbs can you replace? How many pounds of pollution could you keep out of the atmosphere?
Animation:
Giggle robot came out from the recycle trash can and there was a same kind of garbage stick on Giggle's head.

When you recycle, you remove the three most polluting steps. The mining, transportation, and processing of ore adds a lot of pollution to the atmosphere. Recycling takes a lot less energy! Remember, when you recycle you are doing a lot more good than you think. So what are you waiting for?! Go recycle!
The indicator of critical reading in part of distinction

Please choose the 3 following things that cause the most affect to the Global warming

Can
Climate
Electricity
Greenhouse Effect
Store
School Bus
Lights
Pollution
Blanket
